

Super High Power Chip Terminators

■ HPT Series

Features

- By adopting an aluminum nitride substrate, it has extremely excellent heat dissipation performance and realizes ultra-high power consumption.
- Wrap around terminals provide easy and reliable soldering.
- Thin film does not have any innate stress. Therefore, repeated power cycling does not fatigue the element and cause no change in impedance.

Applications

- Wireless base station and Wireless communication devices
- High frequency power supply

◆ Mounting example

Pay special care to heat dissipation when this product is used at maximum rated power.

Mounting example of these series

Above diagram shows a mounting example with thermal bias dissipating heat to the ground. Depending on the application, a heat sink might be needed closely contacting to the bottom of the product.
